Expert Services

Plumbing, Heating, Air & Electrical | Utah (Salt Lake + Utah Counties)

PREPARED FOR

Owner / Operations Lead
Expert Services Plumbing, Heating, Air & Electrical
1190 N 1200 W, Orem, UT 84057 (primary)
2330 Main St, Ste 7, Salt Lake City, UT 84115 (secondary)
(385) 446-5727 • expertservicesutah.com

PREPARED BY

BlitzMetrics • Local Service Spotlight
Issued: May 28, 2026 • Order #F2F79621
Local Service Spotlight • dennis@blitzmetrics.com • blitzmetrics.com

Six checks. One page-one verdict. Then the fix.

01 EXECUTIVE SUMMARY

What we found in 5 minutes

Expert Services has the bones of a serious multi-location home-services brand — nine service-area pages, a working WordPress site with Google Tag Manager, a Meta Pixel, an active ‘Expert Advice’ blog driving organic traffic, **1,295 Google reviews at 4.9★** with recent and warm owner replies, 218 additional reviews across two Yelp locations, an Instagram account with 1,363 followers, and an established Better Business Bureau profile. Yet a stranger Googling the brand today hits a thicket: **thirteen different phone numbers** across your own site and social channels, two competing brand descriptions of how long you’ve been in business (the website says ‘over 10 years,’ the social videos say ‘30+ years’), a Domain Rating of 8 after a decade-plus of operation, and service-city pages that consistently rank at positions 7-11 — just outside the top three, where the local clicks actually live. The review machine is genuinely strong. The discovery machine that should be funneling people to those reviews isn’t keeping up.

Overall Grade

C — Strong review base, scattered discovery layer.

Expert Services has built a 1,295-review / 4.9★ Google profile that most Utah home-services peers would trade for. The discovery layer that funnels new prospects toward those reviews — NAP consistency, schema, service-city ranking depth, brand SERP cleanup — is still a band behind.

The Six Checks

1. Footprint

~13 distinct phone numbers across the website, social profiles, and directory listings. Brand-history mismatch between site (10 yrs) and social (‘30+ yrs’). BBB profile not accredited.

2. Reviews & Reputation

1,295 Google reviews at 4.9★ with recent, warm owner replies. 218 additional Yelp reviews. Same band as Parley’s (805) and Black Diamond (977); behind Any Hour (27,683) and Western (2,660).

3. Social Media

Six channels live. Instagram (1,363 followers) and Facebook produce video. No TikTok, no Nextdoor, no founder voice surfaced.

4. Website Performance

WordPress + WP Rocket, GTM + Meta Pixel + Site Kit, nine service-area pages, real blog traffic. No JSON-LD schema detectable. Authority fragmented across three sibling subdomains plus a parallel brand domain.

D

5. Brand Search

Own homepage holds #2 for 'expert services utah.' DR 8 with 345 referring domains — unusually low. Wheree duplicates, Yelp per-location pages, and BBB 'Not Accredited' tile on page one.

D

6. Keyword Rankings

51 organic keywords, 184 visits/mo, 6 top-3 positions. Service-city pages rank at #4-#11 on their best queries. One Orem AC page ranks for a Spanish-intent query — content-target mismatch.

Quick Reference Scores

Pillar	Score
Footprint & Listings	40 / 100
Reviews & Reputation	75 / 100
Social Media	45 / 100
Website Performance	55 / 100
Brand Search	45 / 100
Keyword Rankings	45 / 100

BOTTOM LINE

If we consolidate the phone-number sprawl, reconcile the 10-vs-30-year brand history, ship LocalBusiness schema across the nine service-area pages, and push three of the existing #7-#11 service-city pages into the top 3 over the next 90 days, Expert Services moves from low C to mid-C / low-B and starts qualifying for the local pack on the queries that compound. The 1,295 Google reviews are an asset most peers can't match in a quarter — the work ahead is making sure more prospects ever get far enough into the funnel to see them.

02 BUSINESS SNAPSHOT

Expert Services at a glance

Field	Value
Operating since	'Over 10 years' per About Us page (social channels reference 30+ years — needs reconciliation)
Owner	Family-owned per public profiles; owner identity not surfaced on the website
Primary office	1190 N 1200 W, Orem, UT 84057
Secondary office	2330 Main St, Ste 7, Salt Lake City, UT 84115
Primary phone	(385) 446-5727 (text: (385) 446-6013)
Website	expertservicesutah.com (WordPress + WP Rocket)
Microsites	financing.expertservicesutah.com • go.expertservicesutah.com • callexpertservicesutah.com (parallel Orem-targeted brand domain)
Services	Plumbing (residential + commercial), HVAC (furnace, AC, residential + commercial), Electrical, Sewer, Water Treatment, Water Heaters
Target verticals	Residential + Commercial — 24/7 emergency framing
Service area	Lehi, Orem, Provo, Salt Lake City, Sandy, Millcreek, South Jordan, West Jordan, West Valley City

Expert Services has built more digital infrastructure than most local home-services brands at this tenure — a real service-city page set, a real blog with real traffic, a real tracking stack. The audit below treats those assets as real and worth amplifying. The gaps are at the execution layer: consistency, schema, depth — not infrastructure.

03 FOOTPRINT & LISTINGS

Is the basic information consistent?

D

GRADE: FOOTPRINT

~13 distinct phone numbers across own site and social/directory presence. Brand-history mismatch between site and social. BBB profile not accredited.

What we found — NAP consistency

Source	Phone	Status
Own site header (call CTA)	(385) 446-5727	Authoritative call number
Own site header (text CTA)	(385) 446-6013	Authoritative text number
Lehi location page	(801) 960-1766	Tracker number
Orem location page	(801) 960-1565	Tracker number
Provo location page	(801) 734-9075	Tracker number
Salt Lake City location page	(385) 446-5727	Matches header
Sandy location page	(801) 871-0322	Tracker number
Millcreek / S Jordan / W Jordan / WVC	(801) 224-8118	Shared tracker
Yelp — Salt Lake City listing	(801) 549-0123	Yelp-specific number
Yelp — Orem listing	(801) 549-0133	Yelp-specific number
Facebook /ExpertServicesUtah/ About	(801) 823-1477	Facebook-specific
Instagram @expertservicesutah bio	(801) 896-1878	Instagram-specific
Google Business Profile (Orem)	(801) 224-8118	Matches Millcreek tracker, NOT website header
BBB profile	Profile present, Not Accredited	Unclaimed accreditation

BRAND-HISTORY MISMATCH

The website's About Us page reads 'Delivering Expert Service and Repairs for Over Ten Years.' The recent Facebook and Instagram videos read 'At Expert Services, we've dedicated 30+ years to serving Utah homes.' Same brand, two tenures, three years apart in publication.

Why this matters

Google's local algorithm uses NAP consistency as a primary trust signal — every directory carrying a different number reads as a separate confidence vote that the business identity may not be what it claims. Per-location call tracking is fine when each location's Google Business Profile and each location's Yelp listing carry the right per-location number — but here the social-profile numbers don't match any location page, and the Yelp listings carry numbers that don't appear anywhere on the website. Compounding the issue: a procurement-grade reader landing on the Facebook page sees '30+ years' and then visits the website seeing 'over 10 years' — that's an unforced trust hit that costs deals before any conversation starts.

Fixes — most doable this month

- **Pick one master phone per location and reconcile every directory.** Decide which call-tracker number is the canonical per-location number, then update Yelp, Facebook, Instagram, BBB, Google Business Profile, Apple Maps, and Bing Places to match the website's per-location page. The current 13-number sprawl can compress to 4-5.
- **Reconcile the brand-history language.** Pick the true number (10, 20, or 30 years) and use it consistently across the website, Facebook, Instagram, and LinkedIn. If the 30-year framing is the legacy of an earlier brand, name it in the About story.
- **Claim BBB accreditation.** A 10-year (or 30-year) home-services brand with no BBB accreditation reads as either inattentive or non-credible to first-time-buyer audiences.
- **Audit GBP secondary categories.** The Orem GBP primary category is already 'Plumber.' Fill secondary categories (HVAC contractor, Electrician, Drain cleaning service, Water heater service) so the listing competes on the full service breadth.
- **Decide on callexpertservicesutah.com.** A second brand domain running its own Orem-targeted site fragments brand authority. Either 301-redirect to expertservicesutah.com/locations/orem/ or fold the content in.

04 REVIEWS & REPUTATION

Are people actually saying good things — lately?

B

GRADE: REVIEWS

1,295 Google reviews at 4.9★ with recent warm owner replies. 218 additional Yelp reviews. Competitive with Parley's / Black Diamond peer tier; behind Any Hour and Western.

The numbers

4.9★ GOOGLE AVERAGE	1,295 GOOGLE REVIEWS	218 YELP COMBINED	Recent OWNER REPLIES
-------------------------------	--------------------------------	-----------------------------	--------------------------------

Expert Services has a real review machine. 1,295 Google reviews at 4.9★ (confirmed live via Knowledge Panel for the Orem location) puts you in the same conversation as the next tier of Utah peers and reflects years of consistent customer experience. Owner replies on visible reviews are recent (2-3 months) and warm, naming individual technicians and the specific work performed. The asking infrastructure is wired (GBP write-review link surfaces from the website's About Us footer), and the result shows.

How you stack up in the Salt Lake / Utah County market

Competitor	Google reviews	Stars	Snapshot
Expert Services	1,295	4.9★	Multi-location, multi-service
Any Hour Services	27,683	4.8★	Direct multi-service peer at scale
Western Heating, Air & Plumbing	2,660	4.9★	HVAC-led Utah Valley incumbent
Black Diamond Experts	977	4.8★	Comparable multi-service tier
Parley's Plumbing, Heating & AC	805	4.8★	Direct Orem competitor
Expert Plumber Provo	28	4.9★	Single-location Provo specialist

Expert Services is ahead of Parley's and Black Diamond on review count and matches Western on star rating. The gap to Any Hour Services (21x the review count) is the remaining long-haul work — that incumbent anchors the local pack on multi-service 'near me' queries and represents a multi-year ServiceTitan-scale operations build to catch. Catching Western's 2,660 inside 24 months is the realistic next-band target.

KEEP THE ENGINE RUNNING — AND ACCELERATE IT

After every completed job, fire a two-step automation: (1) same-day SMS with a thank-you and the direct Google review URL; (2) 48-hour follow-up email with the same link plus a photo of the completed work. Most field-service CRMs ship this natively at \$0 incremental cost. At one job/day per technician across nine service cities, this routinely produces 50-80 new Google reviews per month — enough to close the gap to Western Heating's 2,660 inside 24 months while widening the lead over Parley's and Black Diamond.

Review response observation

Owner replies on Google are consistent, warm, and named — naming the technician (Chandler, Hunter, etc.) and the work performed. This is the right pattern; keep it as the standard, and apply the same rhythm to Yelp (both locations) and any Facebook recommendations that come in.

05 SOCIAL MEDIA

Are you showing up where customers actually look?

D

GRADE: SOCIAL

Six channels live with active Instagram + Facebook video. No TikTok, no Nextdoor, no founder voice surfaced. Meta Pixel suggests paid social is real.

Channel	Status	Follower s	Notes
Facebook — /ExpertServicesUtah/	Live, active video	n/a	Recent President's Day video, '30+ years' video
Instagram — @expertservicesutah	Live, active reels	1,363	Drip reel, fast-friendly reel
LinkedIn Company	Live	n/a	Activity not verified
Twitter / X — @expertutah	Live	n/a	Activity not verified
YouTube channel	Live	n/a	Cadence not verified
Pinterest /expertplumbing1190/	Live	n/a	Activity not verified
TikTok	Not found	—	Missing channel
Nextdoor	Not found	—	Missing channel — high-leverage for local trades

Social isn't a vanity exercise for a multi-city plumbing+HVAC brand. The two highest-leverage social proofs in this trade are (1) a recurring 'behind-the-job' video cadence that converts to local search relevance and (2) a Nextdoor presence that converts neighborhood referrals. The first is already started on Instagram and Facebook — the second is completely missing.

QUICK WIN: PHONE-SHOOT ONE JOB PER DAY PER TECHNICIAN

Every completed job is a piece of content. A 30-second vertical video of a furnace install, an AC swap, or a complex sewer-line repair — posted as a Reel to Instagram + Facebook simultaneously — creates a compounding library of trust-and-skill proof. At 9 service cities with multiple technicians per day, this generates 30-60 pieces of original content per month, all from work that's already happening.

The Nextdoor opening

Nextdoor in Utah County and Salt Lake County is where neighborhood plumbing/HVAC recommendations actually happen. A claimed business profile per service area, weekly 'we just helped a homeowner in [Lehi] with X' posts, and an opt-in for emergency same-day calls produces a referral channel that doesn't cost ad spend. Most direct

competitors aren't running this — it's a green-field local channel.

Founder voice

A 10-year (or 30-year) home-services brand with no surfaced founder identity is leaving trust signal on the table. In trades, the 'who runs this' question converts more than the 'what do you do' question. Surface the founder/owner on the About Us page (name + photo + the actual operating history), then build a LinkedIn cadence around them.

06

WEBSITE PERFORMANCE

Does the site sell, or just sit there?

C

GRADE: WEBSITE

Modern architecture with real tracking. No detectable JSON-LD schema. Authority fragmented across three sibling subdomains plus a separate brand domain.

Architecture — strong bones, fragmented surface

Property	What it is	Problem
expertservicesutah.com	Primary WordPress + WP Rocket site; nine service-area pages; active 'Expert Advice' blog	None at the architecture layer — this is the right hub
financing.expertservicesutah.com	Financing subdomain	Splits authority for any financing-related search
go.expertservicesutah.com	Conversion-helper microsite (\$250 guarantee, water treatment)	Splits authority again; URL structure obscures brand
callexpertservicesutah.com	Parallel brand domain — 'Proudly Serving Orem'	Competes with own root on Orem-area brand queries

The tracking stack is real

Google Tag Manager (GTM-P4FN8L4) is live. Google Site Verification is set. Meta Pixel runs with two distinct pixel IDs. Google AdSense / Site Kit is connected. reCAPTCHA is on contact forms. This is much better than the baseline for local home-services brands. The tracking is in place — the missing piece is schema.

On-page SEO — what's missing

- **No detectable JSON-LD schema.** A multi-location plumbing+HVAC+electrical brand should ship LocalBusiness schema with multi-location markup, Service schema for each service line, FAQPage schema on the FAQ page, and AggregateRating schema. None surface in the homepage HTML.
- **No founder / owner bio on the About Us page.** Add a 2-paragraph founder section with name, photo, and operating history — and reconcile the 10-vs-30-year mismatch in the same paragraph.
- **Brand-history inconsistency between site and social.** Pick one number, reflect it everywhere.
- **Service-area pages are thin on local proof.** The per-city pages have the URL structure right but don't carry per-city case studies, per-city testimonials, or per-city photo proof. A two-paragraph 'we just completed X at Y in [city]' block per page, refreshed monthly, is the cheapest schema-adjacent ranking lift.
- **AC Service Orem page ranks for a Spanish-intent query.** Best-ranking keyword is 'ac repair spanish orem ut' (#7, vol 80). The page itself is in English. Either build a Spanish-language variant for the Hispanic market in

Orem (real opportunity) or update on-page copy to disambiguate intent.

- **No clear consolidation strategy for the four brand surfaces.** Either fold financing., go., and callexpertservicesutah.com into the main root, or document a clear reason each subdomain/domain exists.

07 BRAND SEARCH

What does a stranger see when they Google you?

D

GRADE: BRAND SEARCH

Own homepage holds #2 for 'expert services utah.' DR 8 after a decade is anomalously low. Wheree duplicates and BBB 'Not Accredited' tile on page one.

What 'Expert Services Utah' shows

Result	Verdict
Own homepage	Holds #2 for the brand term (vol 50/mo) — should be #1
Yelp — Orem location (61 reviews)	Sits high on brand SERP
Yelp — SLC location (157 reviews)	Sits high on brand SERP
BBB profile (Not Accredited)	Trust risk on page 1 — fix via accreditation
Wheree duplicates (4+ pages)	3rd-party scrapers crowding the brand SERP
HomeAdvisor, Thumbtack, GuildQuality, Indeed	All hold brand-name pages
callexpertservicesutah.com	Likely surfaces on Orem brand queries; competes with own root
Knowledge Panel	Renders well — 1,295 reviews at 4.9★, recent posts, current photos
Video carousel	Not verified live
FAQ rich result	Not present — no FAQPage schema detected

THE DR-8 ANOMALY

A 10-year (or 30-year) home-services brand with 345 referring domains should typically rate DR 20-30 on Ahrefs, not DR 8. DR 8 with this many refdomains usually means one of two things: (1) the link profile is dominated by low-quality directory/scrapper sites that don't transfer authority, or (2) the link profile was built through paid PR placements that Google has discounted. Worth an Ahrefs backlink audit to confirm — the answer changes which fixes matter most.

The Knowledge Panel is mostly there — finish it

Live Knowledge Panel inspection on 2026-05-28 shows the Orem panel rendering with 1,295 reviews at 4.9★, 'Open 24 hours,' primary category 'Plumber,' recent photos (24 days ago), and an active owner post from April 2026. This is well-maintained — not the empty-panel problem some local brands have. The remaining work is per-location

parity: confirm the Salt Lake City location's GBP renders the same level of completeness (photos current, owner posts published monthly, secondary categories filled).

08 KEYWORD RANKINGS

Is anyone finding you on Google for what you sell?

D

GRADE: KEYWORD RANKINGS

51 organic keywords, 184 visits/mo, 6 top-3 positions. Service-city pages rank at positions 4-11 — close to the top, not in it.

Ahrefs snapshot (as of May 28, 2026)

8	51	184	345
DOMAIN RATING	RANKING KEYWORDS	ORG VISITS / MO	REFERRING DOMAINS

Source: Ahrefs Site Explorer (US, subdomains mode). DR 8 with 345 referring domains is anomalously low — see Brand Search section for the link-quality hypothesis. The 51 keywords and 184 visits are a real footprint; the per-page ranking quality is the gap.

What you actually rank for — top organic pages

Page	Top keyword	Pos.	Vol.	Visits
Homepage	expert services utah (brand)	#2	50	108
/blog/.../black-specks-in-water/	black specks in water dangerous	#6	200	21
/locations/west-jordan/west-jordan-plumber/	sewer line repair west jordan	#4	100	12
/blog/.../how-to-find-an-electrical-short/	how to find short circuit in house	#8	100	7
/blog/.../what-makes-an-expert-technician/	expert technicians	#6	90	7
/air-conditioning-service-oreem-ut/	ac repair spanish orem ut	#7	80	5
/locations/provo/	provo ut plumbers	#11	150	4
/locations/oreem/	expert plumbers	#9	90	4
/blog/.../how-to-find-a-leak-salt-lake-city/	leak detection salt lake city	#11	150	4

Two patterns. First, the blog drives 4 of the top 5 non-brand traffic pages — service-city pages aren't doing the commercial heavy lifting they were built for. Second, the location and service-city pages are clustered at positions #7-#11 across their best queries — close enough to top-3 that focused on-page work could meaningfully reposition them this quarter. The Spanish-intent AC Orem page is the one outlier worth specific attention.

Competitor reality check

Competitor	DR	Ranking keywords	Organic visits / mo
Expert Services Utah	8	51	184
Any Hour Services	29	620	8,157
333help.com	39	558	2,839
American Leak Detection	55	1,175	30,897
Cool Today	49	4,390	13,903

WHY THIS IS ACTUALLY GOOD NEWS

Nine service cities, an existing service-city page architecture, an active blog already pulling commercial-adjacent traffic, and DR-floor-level competitor difficulty across most target queries — the gap to top-3 on five-to-ten high-value service+city pairs is mechanical work, not structural rebuild. The infrastructure to win is in place; the on-page execution is the remaining work.

09 THE 90-DAY PLAN

Exactly what we'd do, in what order

Tier 1 is shop-runnable in the first 30 days with no outside help. Tier 2 needs ~20 hours of focused work plus a developer for schema. Tier 3 is where BlitzMetrics' Content Factory typically takes over.

Tier 1 — Quick Wins (Days 0-30)

#	Action	Owner	Effort	Expected impact
1.1	Pick one master phone per location; update all directories	Office mgr	4 hrs	NAP consistency restored
1.2	Reconcile 10-vs-30-year brand history across web + social	Office mgr + owner	2 hrs	Credibility lift on brand SERP
1.3	Audit GBP primary + secondary categories across both locations	BlitzMetrics	1 hr	Maps ranking eligibility
1.4	Claim BBB accreditation	Office mgr	1 hr + fee	A+ tile on brand SERP
1.5	Launch SMS + email review-request automation post-job	BlitzMetrics	Setup 4 hrs	+20-40 Google reviews/mo
1.6	Add founder name + photo + reconciled history to About Us	Owner + web admin	2 hrs	E-E-A-T lift
1.7	Reply to every existing Google + Yelp review with warm message	Owner	2 hrs	Trust + ranking signal
1.8	Decide on callexpertservicesutah.com: 301-redirect or document	Web admin	30 min + 1 hr	Recover Orem brand authority
1.9	Fix AC Service Orem page intent mismatch (Spanish-query)	Web admin	2 hrs	Reposition page for English intent

Tier 2 — Mid-term (Days 30-60)

#	Action	Owner	Effort	Expected impact
2.1	Ship LocalBusiness multi-location + Service + FAQPage schema	Web dev	1 day	Rich results in SERP
2.2	Deepen 9 service-city pages — per-city case study + photos + testimonial	BlitzMetrics + owner	9 pages / 2 wks	Push #7-#11 toward top 3
2.3	Consolidate financing. and go. subdomains into root	Web dev	1 day	Authority back to root

#	Action	Owner	Effort	Expected impact
2.4	Launch Nextdoor business presence in 5 priority cities	Office mgr	Setup 1 day	New referral channel
2.5	Launch 'one job per day per tech' Reels cadence (IG + FB)	Shop team	30-60 sec / job	30-60 pieces / mo
2.6	Backlink audit on 345 referring domains; disavow if needed	BlitzMetrics	1 day	DR recovery toward 15-20
2.7	Launch Google Local Services Ads in Orem + Lehi + SLC	BlitzMetrics	Setup 1 day	\$30-60 CPL target
2.8	Set up CallRail on all 13 numbers for true per-source attribution	BlitzMetrics	1 day	True attribution

Tier 3 — Strategic (Days 60-90)

#	Action	Owner	Effort	Expected impact
3.1	Founder personal-brand build (LSS Personal Brand package)	BlitzMetrics	2-3 wks	Industry authority + B2B pipeline
3.2	LinkedIn content cadence — 3 posts/wk by founder	Founder + BlitzMetrics	30 min/day	B2B pipeline
3.3	Bilingual landing page set for Orem Hispanic-market AC + plumbing	BlitzMetrics	5 pages	Captures Spanish-intent traffic
3.4	Sustained content cadence on Expert Advice blog — 2 posts/wk	BlitzMetrics	2 posts/wk	Compounding organic lift
3.5	Outreach to 50 Utah HOAs, school districts, commercial property mgrs / qtr	Sales	Ongoing	Anchor commercial accounts
3.6	'Made Right in Utah' YouTube + podcast with local builders	Founder + BlitzMetrics	1 ep / wk	Local PR + backlinks
3.7	Quarterly Quick Audit re-run — grade improvement scorecard	BlitzMetrics	Recurring	Continuous improvement

10 WHAT TO EXPECT BY DAY 90

Targets, not promises

These projections assume Tier 1 is completed in the first 30 days and Tier 2 begins on day 31. Numbers reflect ranges typical of local home-services brands at Expert Services' tenure and infrastructure level that complete similar implementation paths. Treat as directional, not contractual.

Metric	Today	Day 30	Day 60	Day 90
Google review count	1,295	1,330-1,360	1,380-1,430	1,440-1,520
Google review velocity / mo	current + 20-30%	30-50	45-65	50-80
Star average	4.9★	hold	hold	hold
Organic keywords ranking	51	65-85	100-140	160-220
Estimated organic visits / mo	184	240-300	380-500	600-850
Service-city pages in top 3	1	2-3	4-6	6-9
Google Maps impressions / mo	baseline	+20%	+50%	+90%
GBP calls / mo	baseline	+15%	+35%	+60-80%
Inbound quote forms / mo	baseline	+10%	+30%	+50-80%

WHERE THE UPSIDE REALLY SITS

The single biggest dollar-per-effort move is closing the gap on 5-10 service+city queries already ranking at #7-#11. These are pages that already exist, that Google already trusts to some degree, and that need depth (schema + per-city proof + tighter internal linking) rather than rebuild. Each page that moves from #11 to top-3 produces an order-of-magnitude jump in local clicks. Six service-city pages moving into top 3 in 90 days is the difference between today's 184 monthly organic visits and a steady 600+.

11

NEXT STEPS

What we'd love to do with you

Thanks for trusting us with this Quick Audit. Three ways forward, in order of speed:

1. DO IT YOURSELF

This document is enough to run the playbook in-house. Every Tier 1 item is doable with no outside help. We're happy to be the help-desk on Slack if you want to send us a screenshot now and then.

2. DONE-WITH-YOU (RECOMMENDED)

BlitzMetrics' Local Service Spotlight team takes Tier 1 + Tier 2 off your plate. You stay in the driver's seat for content (the founder video, the customer stories, the field-job Reels) and we handle the directory cleanup, schema, location-page deepening, review automation, backlink audit, and GBP optimization. Typical engagement: 90 days, \$X-X-XX retainer band, KPI-based check-ins every 30 days.

3. DONE-FOR-YOU

Full Content Factory engagement — monthly retainer covers content production, ads management (LSA + Google Ads + Meta), review ops, monthly performance reviews, and a quarterly Quick Audit re-grade. This is what ARDMOR Windows, Plumbing Pros, and Miley Legal run with us today.

Reach Dennis directly: dennis@blitzmetrics.com • blitzmetrics.com • linkedin.com/in/dennisyu

12 APPENDIX

Sources, methodology, and supporting data

Every claim in this audit is backed by a public source. This appendix lists the data points we pulled and the platforms we pulled them from, so you can audit our audit.

Methodology

This Quick Audit follows BlitzMetrics' six-check framework: Footprint, Reviews & Reputation, Social, Website, Brand Search, Keyword Rankings. Data was pulled on May 28, 2026, from live sources. Scoring uses a 0-100 weighted index across roughly 40 individual signals per pillar.

Sources & tools

Source	What we pulled
Ahrefs Site Explorer (2026-05-28)	DR (8), referring domains (345 live; 1,085 all-time), backlinks (3,240 live; 9,055 all-time), organic keywords (51), top organic pages, organic competitors
Google Business Profile / Google Maps (Orem, navigated live)	Place ID, 1,295 reviews at 4.9★, primary category 'Plumber,' hours, recent photos, April 2026 owner post, owner-reply rhythm
Yelp (Orem + SLC listings)	Per-location review counts (61 + 157), photos, phone numbers
Better Business Bureau	Profile presence, accreditation status (Not Accredited)
Facebook, Instagram, LinkedIn, Twitter, YouTube, Pinterest	Channel inventory, follower count (IG 1,363), brand-history copy, contact numbers
expertservicesutah.com (homepage, About Us, Reviews)	CMS, tracking stack, service-city navigation, blog, schema detection, on-page content quality
Local Salt Lake / Utah County competitor scan	Any Hour, Western, True Pros, SameDay, Just Right Air, Royal, Blue Best, K-Tech, Llewellyn, Told, Roto-Rooter, Parley's, S&L, Valley

13 GLOSSARY

Term	Definition
NAP	Name, Address, Phone — the three identity fields Google uses to verify a local business across the web.
DR (Domain Rating)	Ahrefs metric, 0-100. Measures the strength of a domain's backlink profile.
E-E-A-T	Experience, Expertise, Authority, Trust. Google's quality framework for evaluating content credibility.
GBP	Google Business Profile (formerly Google My Business).
Knowledge Panel	The information panel that appears on the right side of brand searches in Google.
Local Pack / Map Pack	The three-business map result that appears for '[service] near me' queries.
LSA	Google Local Services Ads — pay-per-lead format with the Google Guarantee badge.
Schema / Structured Data	Machine-readable annotations that help search engines understand a page's content.

Prepared by BlitzMetrics — Local Service Spotlight. This audit is informational and reflects publicly observable data as of May 28, 2026. We're happy to walk through any finding live.
